### ***Terminal Disclaimer***

3. The terminal disclaimer filed on 3-21-2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. 6,717,567 B1 has been reviewed and is accepted. The terminal disclaimer has been recorded.

***Allowable Subject Matter***

4. Claims 21-28, 30-33, and 35-36 are allowed.

5. The following is an examiner's statement of reasons for allowance: Claims 21-28, 30-33, 35-36 are allowable as pointed out by applicant in the terminal disclaimer filed on 3-21-2005. The prior arts Throckmorton et al (5,818,441) and Jacklin (6,396,472) fails to teach a system for displaying digital pictures, comprising: a frame having a frame body, the frame body shaped, dimensioned, and having an appearance of a conventional still picture frame; a wireless receiver disposed inside the frame body to receive pictures; a display co-located with the wireless receiver and framed by the frame body to render the pictures; a processor coupled with the frame, the processor to control the receiving and rendering of the pictures, and having a unique identifier to uniquely identify the frame; and a remote source to provide picture information to the frame, and to provide the unique identifier with the picture information to allow selective configuration of the pictures, the selective configuration including uniquely identifying intended recipients of the picture information using the unique identifier, and a non-volatile memory coupled with the wireless receiver to store the digital picture.

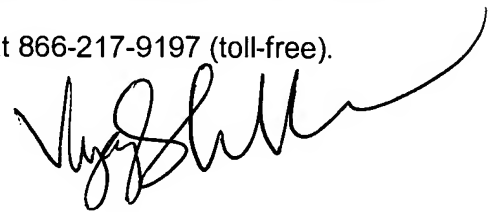

The closest prior art, Throckmorton et al (5,818,441) and Jacklin (6,396,472), either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
